

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Requirements Not Met for Alabama-Coushatta Tribe of Texas Eastside Public Water
System
(PWS# 061870043)

Our water system violated drinking water standards over the past year. Even though this was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

What happened?

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During **September 2025**, we did not monitor or test adequately for Disinfection Byproducts (DBPs) – Total Trihalomethanes (TTHMs) at the approved sampling sites, and therefore cannot be sure of the quality of our drinking water during that time.*

Please see the table below for information regarding missed sample:

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	Sample Location
Disinfection Byproducts – Total Trihalomethanes (TTHMs)	Every September at two sites	0 out of 2	September 2025	DBP MAX DBP01

What should I do?

There is nothing you need to do at this time.

What is being done?

Public Works is taking a special sample with an accredited laboratory to ensure that the drinking water is within acceptable limits.

For more information, please contact: Joy Yarbrough at 936-563-1261.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the **Alabama-Coushatta Tribe of Texas Eastside Water System**
Date distributed: October 30, 2025
